

# **Modélisation avec SQL Developer Data Modeler**

## Exercise 1

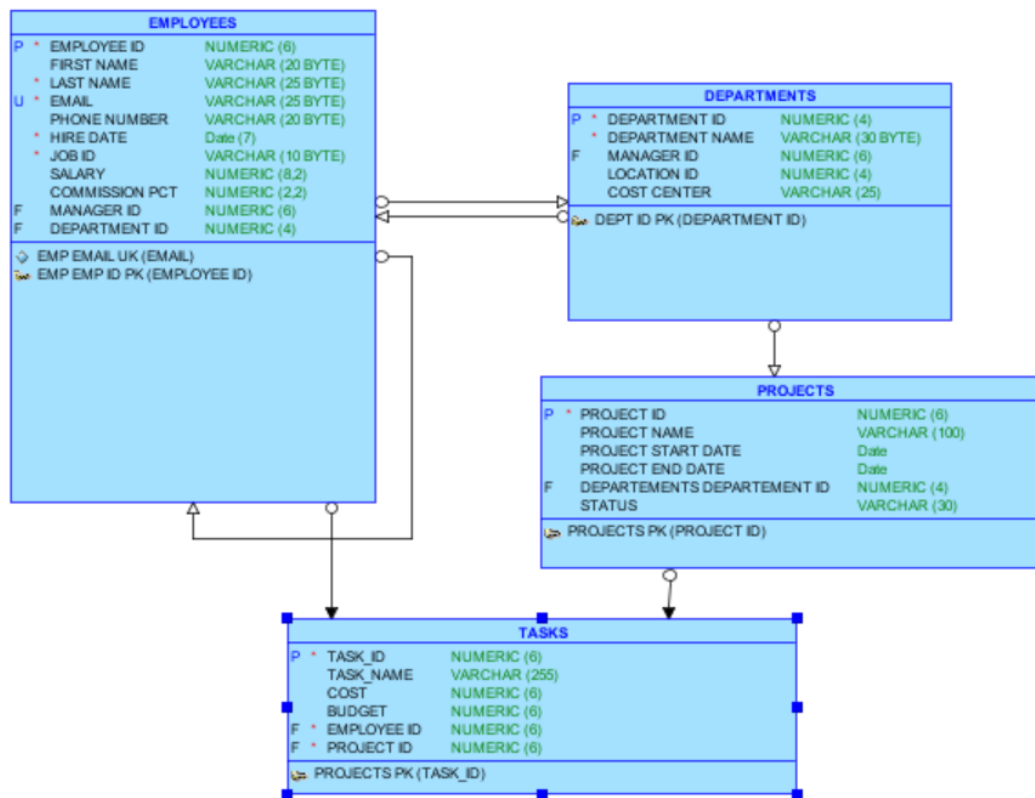

## Exercise 3

```
CREATE TABLE projects (
    project_id                NUMBER(6) NOT NULL,
    project_name              VARCHAR2(100),
    project_start_date        DATE,
    project_end_date          DATE,
    departments_department_id NUMBER(4),
    status                    VARCHAR2(30)
);
```

## Exercise 7

## Exercise 10
